Mudskipper

This little monster is a real fish. It lives among mangroves in Africa, Asia and Australia, where it is able to move from puddle to puddle by holding its breath (in this case, oxygenated water), effectively having its own self-contained scuba tanks.

International wildlife veterinarian, Jennifer Conrad, DVM, uses art to express the joy of animals.

This card has purpose. It provides funds for the veterinary needs of animals around the world, and it provides a striking, environmentally friendly, art card for the humans who care.

Everybody wins.

The Paw Project will receive a portion of the proceeds from the sale of this card to finance reconstructive surgery for tigers and lions whose feet have been crippled by the cruel practice of declawing.
